International road transportation offer

All essential data related to international road transportation shall be presented on the display form. An offer is transportation-based and related to a specific vehicle and its cargo space. A transportation can be in planning stage or already in progress. All active transportation offers are presented from the closest coming date of departure (loading).

Name of column or selection button	Description
Tick	If you want to print out the offer, please click on the box in the first column.
Map	If there is an icon on the transportation offer line in the column „Map", it means that the carrier has additionally specified the route on the map. Map with the description of the route can be opened by clicking on the icon.
Loading date	Displays the planned date of arrival of the vehicle at the departure point, when loading can be performed.
From country	Displays three-letter code of the country of departure. If the country code cannot be immediately understood, click on the menu button „Instructions" and see the list of country classifier, where also names of countries are provided in addition to the combinations of code letters.
Departure point	Free text field displays the name of the city or settlement that will be passed through on the route and where cargo can be loaded.
To country	Displays three-letter code of the country of destination. If the country code cannot be immediately understood, click on the menu button „Instructions" and see the list of country classifier, where also names of countries are provided in addition to the combinations of code letters.
Destination point	Free text field displays the name of the city or settlement, where the freight is planned to complete.
Loading meters (ldm)	Data field displays free loading space of the cargo space in loading meters (ldm).
Weight (t)	Displays free loading capacity of a transport unit in tons (t).
Unit type	Displays the type of scheduled or already dispatched semi-trailer or full trailer on the basis of the size of cargo space, constructional parameters or temperature marker.
Pricing	If there is a radio button on the transportation offer line in the column „Pricing", it means that additional information has been provided about the prices related to the transportation offer. Click on the radio button will open display form of price information. No price information will be displayed to an unregistered user.
Info	If there is a radio button on the transportation offer line in the column „Info", it means that the carrier has provided additional

	information about possible transportation. Click on the radio button will open display form of additional information.
Contact	By clicking on the radio button on the transportation offer line in the column „Contact" you can open a display form of contacts of the company having submitted the transportation offer. Telephone number and/or e-mail address will be displayed.
Request	By clicking on the radio button on the transportation offer line in the column „Request" you can open a type form of transportation request. Upon filling of the form it is not obligatory to fill in all fields of the request. After filling of a type form a registered user can send the request directly to the company having submitted the transportation offer. E-mail address has been taken from the register of carriers.
My offers	By clicking on the button „My offers", a registered user will enter the work form of his offers. If no offers have been specified, an empty work form will open. No selection button will be displayed in case of an unregistered user.
Print	All offers can be printed, for which a tick has been made in the first column of the transportation offer line of the column „Print". Contact data related to the transportation offer will be printed as well. If any price information and/or additional information related to the transportation has been provided, it will also be printed. No price information will be printed in case of an unregistered user.
Find (use of filter)	Transportations can be filtered using a filtering function. Filtering will enable to highlight the specific information interesting the user. Filtration is possible on the basis of markers of country of departure, country of destination, loading date, unit (trailer) type, free cargo space and free loading space. For filtering markers can be used one by one, in combination or all together. To perform filtering, please enter the specific search criteria on the data fields of search and click the button „Find". After filtering, all transportation offers meeting the criteria will be displayed on the basis of the loading date.
