

International road freight offer – work form

Name of column or button	Description
Tick	If you want to amend the data of offer or delete the offer, please tick the relevant offer by clicking on the box in the first column of the offer line.
Map	The function enables to visualise the planned transportation route. Use of the function is optional. The planned route can be specified on the map after the offer has been saved. Click on the icon will open a map in Google Maps. After choosing the suitable scale, please click consecutively on the points marking cities or settlements. The resulting route will be saved and Google Maps window will be closed.
Loading date	Select the planned loading date from the calendar.
From country	From the options provided in the classifier please select the country, where loading of cargo is offered and where the transportation will start (continue).
Departure point	Write (in free text) the name of the city, settlement or place, where loading is offered. Precise address will be further agreed between the client and the carrier.
To country	From the options provided in the classifier please select the country, where the planned transportation will end.
Destination point	Write (in free text) the name of the city, settlement or place, where unloading is offered. Precise address will be further agreed between the client and the carrier.
Loading meters (ldm)	In the field of free cargo space, please write the volume of the offered free cargo space in loading meters (ldm). Values of loading meters can be entered within the range 0,1-15,0 ldm. Values of loading meters shall be entered in the data field with the precision of a decimal.
Weight (t)	In the field of free loading capacity, please write the value of free loading capacity in weight units (t). Values of weight can be entered within the range 0,1-40,0 t. Values of weight shall be entered in the data field with the precision of a decimal.
Unit type	From the options provided in the classifier please select suitable (necessary) type of cargo space of a semi-trailer or full trailer.
Pricing	Information related to transportation price can be entered after the offer has been saved. Click on the radio button will open work form of price information. Entry is optional. It is recommended to use mainly in cases when especially attractive single transportation prices can be offered, in order to achieve better usage of space upon transportation of partial loads. The same applies to cases, when prices below average of the market can be offered permanently on certain routes irrespective of the client ordering the transportation.

Info	Information related to transportation can be entered after the offer has been saved. Click on the radio button will open work form of additional information. Entry is optional. Generally it is used in cases, when the user wants to submit additional information about the transportation, further advantages and benefits, restrictions etc.
Save	Click on the button will save the new offer and any amendments made in already entered offers. To amend the entered offer information, click on the „Tick“ box of the first column of relevant line. After this the offer line will become active.
Delete	Click on the button enables to delete the offer line with a tick in the box in the first column. The operation will delete all information entered on the offer line.
